Revenue

Log Sales

Gross income for the month was **\$94,107.32** with an average sale price over all grades of **\$110.93** per tonne.

November 2021 - Log Markets, Hawkes Bay

The November export prices have dropped \$13.86/Jas m³ on average. The decrease has affected the pruned grades slightly more.

Radiata log inventories on the main Chinese ports we monitor have decreased to 4.60Mm³, with daily offtake relatively solid at 73Km³ per day as we head into the Northern Hemisphere's winter. Inventory remains 40% above 2018-2020 levels and this is creating downward pressure on CFR sales price.

As mentioned last month, there has been a structural reset in the Chinese economy with the government looking to slow the property market and reduce debt levels. As is often the case, many believe the market has overcorrected. Several factors have contributed to weaker log demand / usage however, the major reasons are adjustments to the construction market due to high debt ratios of property development companies and the energy crisis limiting factory output. China's zero-tolerance policy towards Covid-19 continues to have impacts as workers in new outbreak regions get sent home to control the spread of the virus.

The freight market has continued to trend downward however, at this stage the Chinese appear to be taking advantage of freight cost gains by lowering the CFR price. Due to the lag time of ship chartering, we expect to see pre-booked vessels in December also affecting AWG prices.

The NZD has continued to slip back against the USD since the end of October. The change has not been enough to add some AWG value for forest owners.

Domestic pruned log prices have fallen \$15 this quarter due to weaker AWG export pricing and factoring in the spring effects on Jas conversions.

Grade Recovery

Grade out turn for November is as follows:

Chart 1: Grade Recovery for Month

Pruned recovery for November comprised 18% of overall sales volume, all of which was sold as export pruned grades.

High quality export sawlog (AO, A and K grades) made up 55% of the total production volume, with lower quality export (KI and KIS grades) comprising 12% of volume.

The remaining 15% of production was made up of domestic pulp and binwood.

Expenditure
