- Recovered volume per hectare to date is **787.7** tonnes

(NB: Measured harvest areas are estimated monthly and reconciled with satellite imagery prior to valuations, they are subject to change and should be used as a guide only.)

Expenditure for the month relates to grass seeding and environmental costs relating to the Hawkes Bay Regional Council compliance monitoring of the resource consent. This included site inspection and reporting.

## Planned activities for January 2022:

The planned activities for January or early February are to undertake the rehabilitation of the ground-based harvesting undertaken last May / June. The site has been far too wet to undertake this work until now.

The culvert crossing at temporary Landing 5 requires work as the stream water has eroded poor quality soil at the out fall and the culvert does not meet the required embedment rules.

Kind Regards
