January 2022 - Log Markets, Hawkes Bay

January export prices have remained flat. This is largely thanks to one of our major exporters who have been paying a premium above the rest of the market. In order to get log supply, the other exporters have had to match prices where they can.

Radiata log inventories on the main Chinese ports we monitor have decreased to 3.9Mm³, with daily offtake tapering off to 62Km³ per day. This expected to reduce further to almost zero as the Lunar New Year approaches in early February.

At this time of the year, we normally see inventory building but supply from all major sources into China has been contracting with the lower USD returns. Overall Chinese demand for logs has softened due to a slowdown in the construction sector and high market prices. The effects of China's response to a heated property market and high levels of debt at the country's second-largest property developer (Evergrande Group), have started to ripple through the construction sector.

Log supply from South America into China is expected to be subdued because of high freight costs. This will partly offset the downward pressure on log demand and prices. In the medium-term, demand and prices are also likely to be supported by the imminent removal of Russian logs from the export market in 2022.

The NZD has continued to slip back against the USD since the beginning of January. The change will hopefully add some AWG value for forest owners next month.

Again, this Quarter Domestic pruned log prices have settled flat, due to concerns relating to the slowdown in harvesting affecting production / supply.

Grade Recovery

Grade out turn for January is as follows:

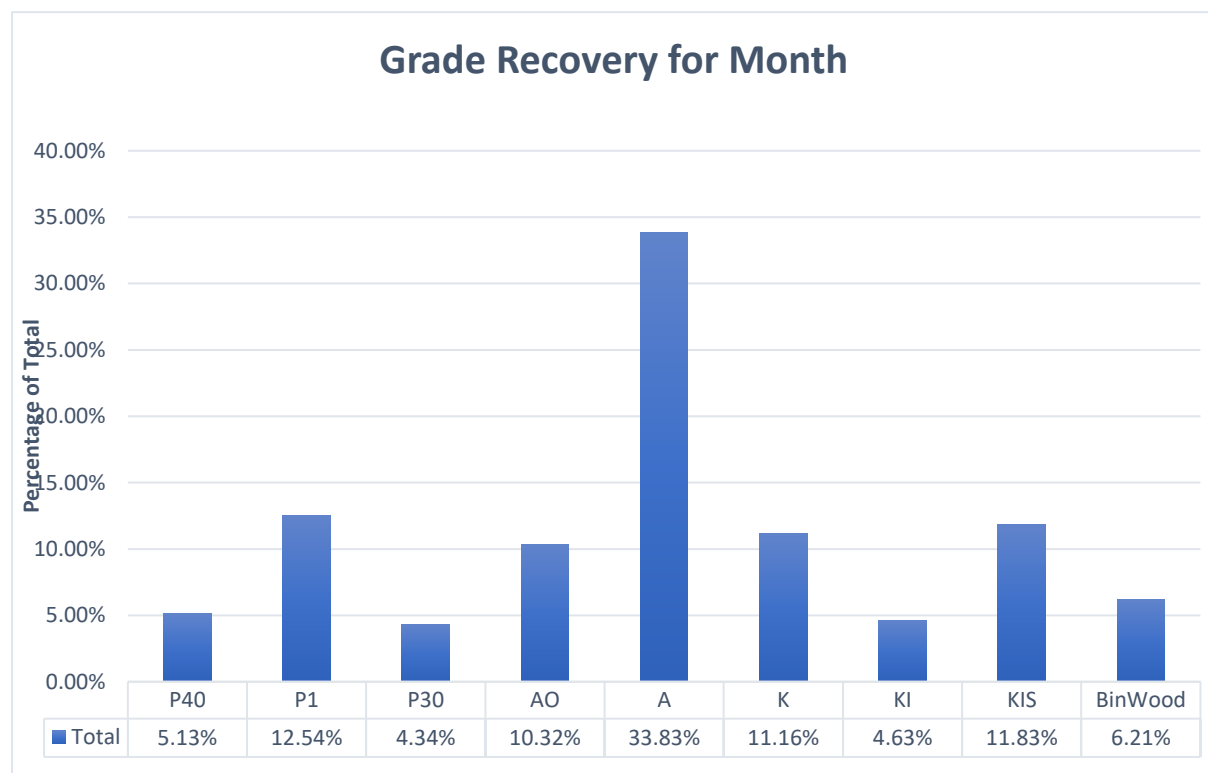

Chart 1: Grade Recovery for Month

Pruned recovery for January comprised 22% of overall sales volume, 13% of which was sold as domestic pruned grades.

High quality export sawlog (AO, A and K grades) made up 55% of the total production volume, with lower quality export (KI and KIS grades) comprising 17% of volume.

The remaining 6% of production was made up of domestic pulp and binwood.

Expenditure

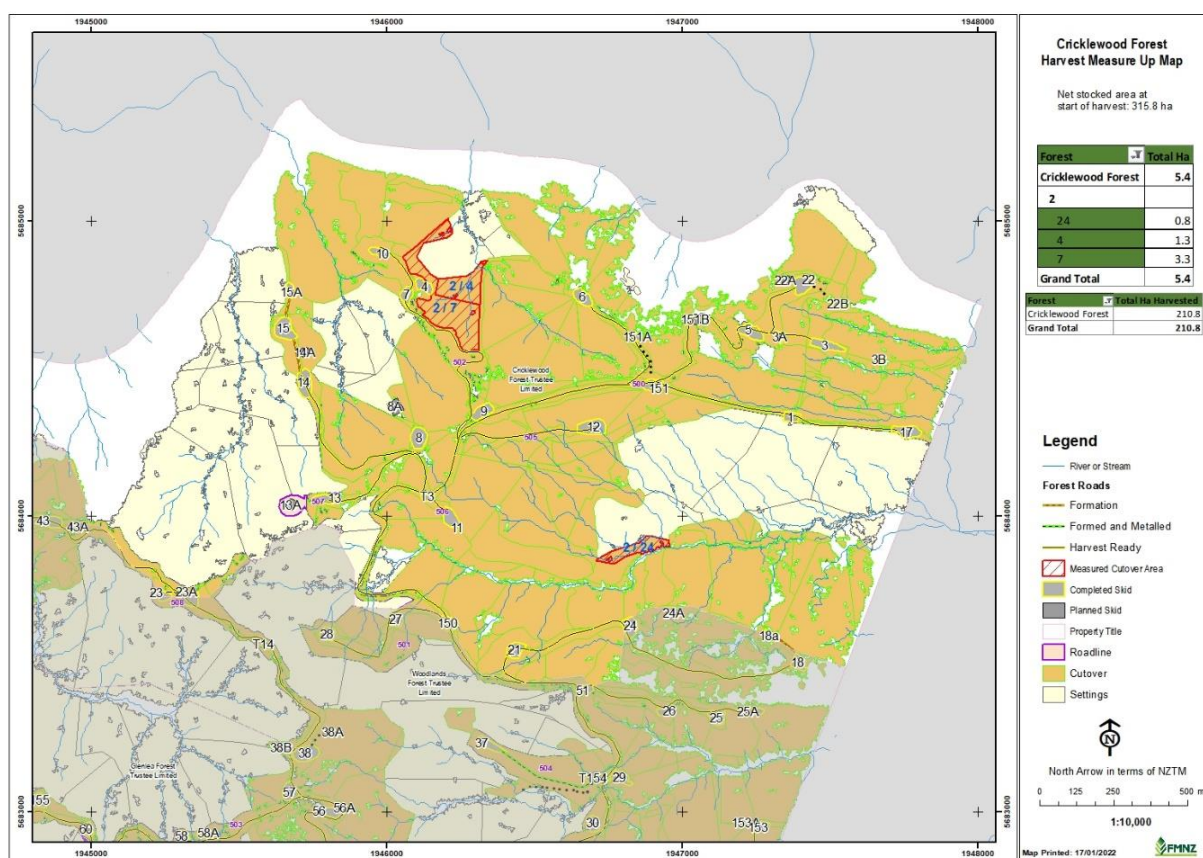

Harvesting

The total logging cost for the month was **\$75,694.00**, an average of **\$38.76** per tonne.

Harvest expenditure for the month is summarised below in Table 1:

LOGGING COSTS		TOTAL
January	Logging – tonnes	\$75,694.00
		\$75,694.00

Table 1: Logging Costs

Pic 1: Progress Map

Harvesting commenced on the 17th of January 2022 after the Christmas and New Year break.

The harvest crew cleaned up Landing 24 and then moved to Landing 4 on Hunter Road to pull Setting 7. A couple of extensions were added to the skyline to get the distance to the old access track in Setting 6 as the terrain is too steep for a dozer.

The shift to Hunter Road was undertaken so that log cartage up and out of Hunter Road was carried out during the summer months so should it rain, the road will dry out quickly.

Cartage

Cartage is managed by Harvest Logistics Ltd, who organise the despatch and supply of log trucks into the forest.

The total cartage expense for the month was **\$63,959.81** which is an average unit rate of **\$32.75** per tonne.

Cartage rates have increased in January because of the effects of diesel price rises.

Cartage expenditure for the month is summarised below in Table 2:

CARTAGE COSTS		TOTAL
January	Cartage - Truck	\$63,959.81
	Weighbridge	\$726.90
		\$64,686.71

Table 2: Cartage Costs

The average cart rate for January inclusive of weighbridge fees is **\$33.12** per tonne.
